NEW SUCCESS IN RAILWAY FIELD

In November 2016 LUKOIL Lubricants East Europe has achieved technical approval type in preliminary stage for product "LUKOIL Stabio 68, Synthetic Compressor oil" being the only manufacturer of lubricants in the country that has obtained the approval of railway equipment for this type of oil. The railway technical approval of critical railway products is a prerequisite for them to be used in rail transport (according to UNWTO No 290/2000). Stabio LUKOIL Synthetic oil is used for lubrication of compressors for the transport of air and other gases which are not used as a cooling medium. Oil can be used in screw compressors heavy equipment of locomotives, turbo-compressors and hydraulic systems. Is an oil composition recommended for use in severe operating conditions in advanced equipment.
