LUKOIL TO PROVIDE SERVICING OF MACHINERY OPERATING AT RASPADSKY OPEN PIT MINE

LUKOIL has launched the servicing program at Raspadsky, EVRAZ's broad-scale surface coal mine. The company will supply a mobile servicing station to Razrez Raspadsky (part of Raspadskaya Coal Company ofEVRAZ Group). The custom-built station will facilitate efficient change of lubricants and specialty fluids used in the machinery.

The mobile station has tanks for storage of new engine, gear, and hydraulic oils, anti-freezes and greases, as well as spent oil. It provides for onsite change of working fluids in dump trucks and excavators, reducing risks of forced machinery breakdowns.

EVRAZ is one of the world's largest metals and mining companies with assets in Russia, the United States, Canada, the Czech Republic, Italy and Kazakhstan. The Group has been using LUKOIL lubricants since 2007.
