LUKOIL IN ROMANIA CERTIFIED AS A SUPPLIER FOR AUTOMOTIVE INDUSTRY

LUKOIL Lubricants East Europe, a subsidiary of LLK-International LLC, which produces LUKOIL lubricants in Romania, has successfully passed certification in the international quality management system for the automotive industry in accordance with the requirements of IATF 16949: 2016.

Certification according to this standard is the basis of a quality management system for the automotive industry. The application of this standard allows us to guarantee the quality of products throughout the chain of suppliers, in particular, of LUKOIL lubricants supplied to the conveyors of leading international car manufacturers.

The assessment was carried out by experts from Lloyd's Register Quality Assurance - one of the largest international audit companies involved in the assessment of activities in the field of quality, labor protection and the environment. LUKOIL Lubricants East Europe has demonstrated a professional and customer-oriented approach, as well as a high level of environmental protection and working conditions. Based on the results of a two-stage audit, according to experts, the LUKOIL plant in Romania has a fully functioning quality management system that meets the strict requirements of the automotive industry.

LUKOIL Lubricants East Europe has added to the list of LUKOIL production sites certified based on the requirements of the IATF 16949: 2016 standard, which already include factories for the production of oils in Austria, Finland and Russia. The certification of the Company's oil production in Romania has once again confirmed the compliance of LUKOIL's lubricants and services with high international quality standards, regardless of the country of their production.

LUKOIL Lubricants East Europe was founded in 2006. The production capacity of the plant allows the production of more than 40 thousand tons of lubricants per year, the range of which includes more than 400 products. In addition to production, the company sells LUKOIL oils in Eastern and Southern Europe. This enterprise was the first in the Group to launch the production of premium line motor oils LUKOIL GENESIS.
